

Please join us for a half-day meeting of the Bay Bunch user group hosted by Velocity Software, Jeskell and IBM. The Bay Bunch is a regional group consisting of zSeries and Linux enthusiasts. This is a free meeting. If you are interested in issues relating to zSeries and Linux on zSeries, you won't want to miss these informative sessions!

**When:** Thursday, November 3, 2005      **Registration:** Register by Nov. 1, 2005  
Registration Form on Page 2  
**Where:** IBM - San Francisco Office      Email: [melissa@velocitysoftware.com](mailto:melissa@velocitysoftware.com), or  
425 Market Street      Fax: 650-964-9012  
25th floor, Classroom 4      There is no charge for this meeting and  
lunch is included!

### Agenda

- 8:30am      **Coffee and pastries sponsored by Velocity Software**
- 9:00am      **z/VM Platform Update: Introducing z/VM V5.2**  
By Alan Altmark, z/VM Development IBM Endicott
- Catch the latest news on z/VM product enhancements. This session will provide you a high-level overview of the new z/VM Version 5.2 product announcement. z/VM V5.2 offers new, leading edge virtualization capabilities and a pricing model that will help enterprises more easily exploit the on demand capabilities of IBM System z9 and eServer zSeries virtualization technology.
- 10:00am      **z/VM zSeries Linux at CA through the years**  
By Brian Jagos, Senior Consultant z/OS – MVS z/VM / Linux, Computer Associates International
- Brian will be discussing the evolution of z/VM at Computer Associates International. This session will include a history of CA's zSeries Linux through the years, plans for the future and current server status including what applications are running. Brian will also cover some of the vendors CA uses, as well as the software used to manage these guests and the z/VM environment.
- 11:00am      **Break**
- 11:15am      **Linux on zSeries**  
By Bill Reeder, zSeries Linux Sales and Strategy, IBM
- Don't miss the one and only Bill Reeder discuss how Linux is architected for Linux on zSeries, which workloads make the most sense for Linux on zSeries, which workloads make good sense for Linux on zSeries and which workloads make no sense for Linux on zSeries. Bill will also cover some customer examples of workloads.
- 12:15pm      **XIP (eXecute In Place) for Linux on z/VM Implementation and Analysis**  
By Tony Noto, Senior Developer, Velocity Software, Inc.  
Tony will review the implementation of XIP in a zSeries environment, identify potential pitfalls, and discuss the measured performance impact of XIP for Linux in a z/VM environment.
- 1:00pm      **Raffle**  
To encourage and reward those who fill out the evaluations and attend the entire meeting, we will be having a drawing at the end of the day for fun prizes! You must be present to win.
- 1:15pm      **Lunch**  
Lunch is sponsored by IBM Premier Business Partner Jeskell.

**Directions to 425 Market Street:** IBM is located at the corner of Market and Fremont Street in downtown San Francisco; near the Embarcadero BART Station. <http://www.mapquest.com/>
